1. After our conference of this date, it occurred to me that it might be helpful to both of us if I made as complete an outline as possible of all the projects which are included under PASTIME. Your attention is therefore called to the following, which describes the financial requirements and current status of each PASTIME project:

a. CABINDA - Basic Plan CABINDA was approved 1 August 1950 for an indefinite period at a cost estimated at [ ] for the first six months of hostilities. This sum, which has been authorized and allocated, according to our files, was intended to cover supplies and equipment for 15 case officers and junior case officers who would stay behind in the event of hostilities. To my knowledge no progress has been made on this project.

b. CADEAU - This project or plan is to provide for supplies, equipment, etc., for plan CABINDA, and the expenditures were covered by the allocation of funds to CABINDA. The following list of supplies, etc., for each staybehind case officer was as follows:

- 2 pistols and 500 rounds of ammunition therefor
- 1 submachinegun and 2500 rounds of ammunition therefor
- Any type rations for a period of 1 week
- 1 SSTR-1
- \$2500 in gold and U.S. currency
- 3 complete changes of clothing and whatever winter equipment is needed
- 1 first-aid kit and drugs as needed

c. CADGER - Terminated 31 December 1951.

d. CAGLIO - Approved for the period from 1 October 1951 through 30 September 1952. Cost: \$1,125.00 for agent compensation. CAGLIO is a W/T operator.

e. CAJUN - Approved for the period from 1 July 1951 through 30 June 1952. Cost: \$1,000.00 and 10,000.00 DMW. This project involves the locating and training of W/T agents in Berlin.

f. CALAMUS - Approval of project requested 30 November 1951, for the period from 1 July 1951 through 30 September 1952. Cost: 5,000.00 DMW for travel and operational expenses, including 3,200.00 DMW retroactively for the period from 1 January 1951 through 30 June 1951. This project involves the psychological assessment of agents by CALAMUS 3 and 4 and the W/T training of CALAMUS 2a.

g. CATARACT 2 - Approved for the period from 1 July 1951 through 30 September 1952. Cost: 1500 DMW for agent compensation. CATARACT 2 is a W/T operator.

h. CATTY 4 - Approved for the period from 1 July 1951 through 30 September 1952. Cost: 1,750.00 DMW for compensation and operating expenses. CATTY 4 is a W/T operator.

i. FOLD - This is a project for locating and setting up safe houses for the staybehind program. A project outline has been requested of the field. Cost: unknown. Progress: None.

j. KIBITZ - Expired 31 December 1951. The field has been requested (4 December 1951) to submit a new project outline. Cost from 1 January 1951 through 31 December 1951: \$9,445.00 (including \$4,185.00 for agent compensation, \$3,580.00 for operating expenses, and \$1,680.00 for travel). KIBITZ is the Karlsruhe project for recruiting head agents and agents for the staybehind program.

k. MISSOURI - Approved for the period from 1 July 1950 through 31 December 1950. Cost: \$390 plus 400 DMW. MISSOURI is the Karlsruhe safe house used for commo training. The field has been requested to submit a new project outline.

l. VULTURE - The field has been requested to submit a project outline. An outline dated 13 November 1950 states that VULTURE involves the burial of commo equipment only, at the rate of 1 burial per month. No costs were anticipated other than the cost of the commo equipment. Despite the statement concerning the "burial of commo equipment only", it is customary to bury the following each cache:

- 1 SST-1-E Transmitter
- 1 SSR-1-G Receiver
- 1 SSP-1-D Power Supply
- 3 Browning automatic pistols, with clip
- 1 extra clip and cleaning equipment for pistol
- 150 rounds of .9 or 7.65 ammunition
- 100 gold louis d'or coins valued at \$9.00 each

m. WRINKLE - Berlin burial project. Now obsolete.

2. The total cost, aside from equipment, of all the projects listed above comes to approximately [ ]

3. With Para 2, above, in mind, it is obvious that [ ] outline of PASTIME, dated 15 November 1950, includes only the actual cost of the PASTIME evacuation program, and not the cost of the individual projects listed above.

4. I should appreciate having your reaction, in view of the preceding information, as to whether you deem it wise to submit a basic plan for PASTIME. This designation has thus far been considered pretty much as only a name for the West German staybehind program, and not as a basic plan. Since the individual projects and/or agents are all (or will be) covered by individual project approvals, there is considerable doubt in my mind concerning the necessity for any submission of a basic plan for PASTIME. Perhaps the chief advantage of submitting such a basic plan would consist in stimulating the entire staybehind program.

5. I should appreciate having your reactions after you have had an opportunity to consider this memorandum.
